SUBJECT INDEX

Abrasion
gouging and sliding abrasion of austenitic Mn steels reinforced by hard phases, 313
a technique to study abrasive wear in contacts with particulate materials, 237
Adhesion
variational and non-variational theory of frictionless adhesive contact between elastic bodies, 63
Alloys
effect of laser processing on the cavitation erosion of Cr–Mo–Cu alloy cast iron, 13
wear in Al–Si alloys under dry sliding conditions, 119
Aluminium
wear in Al–Si alloys under dry sliding conditions, 119

Bearings
a comparison between two numerical techniques for hydrodynamic journal bearing problems, 77
the effect of humidity on dry bearing torque, 215
Boring Trepanning Association machining
investigations into surface topography, microhardness and residual stress in Boring Trepanning Association machining, 89

Case histories
some case histories of wear-related failures of metallic materials, 205
Cast irons
effect of laser processing on the cavitation erosion of Cr–Mo–Cu alloy cast iron, 13
Cavitation
effect of laser processing on the cavitation erosion of Cr–Mo–Cu alloy cast iron, 13
investigation of cavitation erosion using X-ray residual stress analysis, 343
Channels
the influence of couple stresses on the flow of fluid through a channel with injection, 191
Chromium
effect of laser processing on the cavitation erosion of Cr–Mo–Cu alloy cast iron, 13
effect of microstructure and properties on the high temperature wear characteristics of 3Cr2W8V (H21) steel, 101
Coatings
on the improvement of the performance of high speed steel turning tools by TiN coatings, 199
microstructural aspects of wear-resistant Stellite and Colmonoy coatings by laser processing, 137
solid lubricant coatings using electromagnetic railgun acceleration, 251
Coins
a predictive test for coin wear in circulation, 329
Colmonoy
microstructural aspects of wear-resistant Stellite and Colmonoy coatings by laser processing, 137
Composites
slurry erosion of polyphenylene sulphide–glass fibre composites, 1
Compressors
study of single-stage axial flow compressor performance deterioration, 51
Contacts
surface region damage of machined Inconel-718 Ni-base superalloy using natural and controlled contact length tools, 225
a technique to study abrasive wear in contacts with particulate materials, 237
variational and non-variational theory of frictionless adhesive contact between elastic bodies, 63

© Elsevier Sequoia/Printed in The Netherlands

Copper
effect of laser processing on the cavitation erosion of Cr–Mo–Cu alloy cast iron, 13

Dry sliding
wear in Al–Si alloys under dry sliding conditions, 119

Elastic bodies
variational and non-variational theory of frictionless adhesive contact between elastic bodies, 63
Electromagnetic railgun acceleration
solid lubricant coatings using electromagnetic railgun acceleration, 251
Erosion
effect of laser processing on the cavitation erosion of Cr–Mo–Cu alloy cast iron, 13
investigation of cavitation erosion using X-ray residual stress analysis, 343
slurry erosion of polyphenylene sulphide–glass fibre composites, 1

Failure
some case histories of wear-related failures of metallic materials, 205
Fibres
slurry erosion of polyphenylene sulphide–glass fibre composites, 1
Films
thermal and squeezing effects in non-newtonian fluid film lubrication of rollers, 175
Flow
the influence of couple stresses on the flow of fluid through a channel with injection, 191
Fluids
the influence of couple stresses on the flow of fluid through a channel with injection, 191
Friction
the effect of mechanical and chemical surface properties on the friction of magnetic tapes, 29
investigation of tribological characteristics of rolling–sliding friction systems by means of systematic wear experiments under well-defined conditions, 153
variational and non-variational theory of frictionless adhesive contact between elastic bodies, 63

Gouging
gouging and sliding abrasion of austenitic Mn steels reinforced by hard phases, 313

Humidity
the effect of humidity on dry bearing torque, 215
Hydrodynamics
a comparison between two numerical techniques for hydrodynamic journal bearing problems, 77

Inconel-718
surface region damage of machined Inconel-718 Ni-base superalloy using natural and controlled contact length tools, 225
Injection
the influence of couple stresses on the flow of fluid through a channel with injection, 191

Lasers
effect of laser processing on the cavitation erosion of Cr–Mo–Cu alloy cast iron, 13
microstructural aspects of wear-resistant Stellite and Colmonoy coatings by laser processing, 137
Lubricants
solid lubricant coatings using electromagnetic railgun acceleration, 251
Lubrication
thermal and squeezing effects in non-newtonian fluid film lubrication of rollers, 175

Magnetic tapes
the effect of mechanical and chemical surface properties on the friction of magnetic tapes, 29
Manganese
gouging and sliding abrasion of austenitic Mn steels reinforced by hard phases, 313
Metallic materials
some case histories of wear-related failures of metallic materials, 205
Microhardness
investigations into surface topography, microhardness and residual stress in Boring Trepanning Association machining, 89

Microstructure
effect of microstructure and properties on the high temperature wear characteristics of 3Cr2W8V (H21) steel, 101
microstructural aspects of wear-resistant Stellite and Colmonoy coatings by laser processing, 137
Molybdenum
effect of laser processing on the cavitation erosion of Cr–Mo–Cu alloy cast iron, 13

Nickel
surface region damage of machined Inconel-718 Ni-base superalloy using natural and controlled contact length tools, 225
Non-newtonian fluids
thermal and squeezing effects in non-newtonian fluid film lubrication of rollers, 175
Numerical techniques
a comparison between two numerical techniques for hydrodynamic journal bearing problems, 77

Particulate materials
a technique to study abrasive wear in contacts with particulate materials, 237
Polyethylene
the role of counterface imperfections in the wear of polyethylene, 277
Polyphenylene sulphide
slurry erosion of polyphenylene sulphide–glass fibre composites, 1
Precipitation-hardening
rolling–sliding wear on precipitation-hardened structures of an austenitic steel, 261

Rollers
thermal and squeezing effects in non-newtonian fluid film lubrication of rollers, 175
Rolling
investigation of tribological characteristics of rolling–sliding friction systems by means of systematic wear experiments under well-defined conditions, 153
Rolling wear
rolling–sliding wear on precipitation-hardened structures of an austenitic steel, 261

Silicon
wear in Al–Si alloys under dry sliding conditions, 119
Sliding
gouging and sliding abrasion of austenitic Mn steels reinforced by hard phases, 313
investigation of tribological characteristics of rolling–sliding friction systems by means of systematic wear experiments under well-defined conditions, 153
sliding behaviour of dual phase steels in vacuum and in air, 369
Sliding wear
distribution of wear rate data and a statistical approach to sliding wear theory, 295
rolling–sliding wear on precipitation-hardened structures of an austenitic steel, 261
Squeezing effects
thermal and squeezing effects in non-newtonian fluid film lubrication of rollers, 175
Steel
effect of microstructure and properties on the high temperature wear characteristics of 3Cr2W8V (H21) steel, 101
gouging and sliding abrasion of austenitic Mn steels reinforced by hard phases, 313
on the improvement of the performance of high speed steel turning tools by TiN coatings, 199
rolling–sliding wear on precipitation-hardened structures of an austenitic steel, 261
sliding behaviour of dual phase steels in vacuum and in air, 369
Stellite
microstructural aspects of wear-resistant Stellite and Colmonoy coatings by laser processing, 137
Stiffness
dynamic stiffness analysis in tribo-contacts, 353
Stress
the influence of couple stresses on the flow of fluid through a channel with injection, 191
investigations into surface topography, microhardness and residual stress in Boring Trepanning Association machining, 89

Superalloys
surface region damage of machined Inconel-718 Ni-base superalloy using natural and controlled contact length tools, 225
Surfaces
the effect of mechanical and chemical surface properties on the friction of magnetic tapes, 29
investigations into surface topography, microhardness and residual stress in Boring Trepanning Association machining, 89
surface region damage of machined Inconel-718 Ni-base superalloy using natural and controlled contact length tools, 225

Titanium nitride
on the improvement of the performance of high speed steel turning tools by TiN coatings, 199
Tools
on the improvement of the performance of high speed steel turning tools by TiN coatings, 199
surface region damage of machined Inconel-718 Ni-base superalloy using natural and controlled contact length tools, 225
Torque
the effect of humidity on dry bearing torque, 215
Tribocontacts
dynamic stiffness analysis in tribocontacts, 353
Tribological characteristics
investigation of tribological characteristics of rolling–sliding friction systems by means of systematic wear experiments under well-defined conditions, 153
Tungsten
effect of microstructure and properties on the high temperature wear characteristics of 3Cr2W8V (H21) steel, 101
Turning
on the improvement of the performance of high speed steel turning tools by TiN coatings, 199

Vanadium
effect of microstructure and properties on the high temperature wear characteristics of 3Cr2W8V (H21) steel, 101

Wear
some case histories of wear-related failures of metallic materials, 205
distribution of wear rate data and a statistical approach to sliding wear theory, 295
effect of microstructure and properties on the high temperature wear characteristics of 3Cr2W8V (H21) steel, 101
investigation of tribological characteristics of rolling–sliding friction systems by means of systematic wear experiments under well-defined conditions, 153
microstructural aspects of wear-resistant Stellite and Colmonoy coatings by laser processing, 137
a predictive test for coin wear in circulation, 329
the role of counterface imperfections in the wear of polyethylene, 277
rolling–sliding wear on precipitation-hardened structures of an austenitic steel, 261
a technique to study abrasive wear in contacts with particulate materials, 237
wear in Al–Si alloys under dry sliding conditions, 119
Wear resistance
microstructural aspects of wear-resistant Stellite and Colmonoy coatings by laser processing, 137

X-ray residual stress analysis
investigation of cavitation erosion using X-ray residual stress analysis, 343
